Prototype 1 Meeting Agenda Roll Call

Member Name	Is Present
Justin Goulet	
Christopher Larsen	
Mikal Callahan	
Brock Corbett	
Dr. Shauninn-Wu	
Thomas (Ty) Usrey	
Mooting Start	Mosting Adjournment
IVICELITY Start	Meeting Adjournment
3:00 est.	

Topics of Discussion:

Outstanding Issues:

Decision matrix - with options and selection criteria defined

- How we interpret requirements
- Ability to theme out prototype
- Does not need to be actual prototype but a decision of how we are going to proceed
 - Does it meet requirements
- Skeleton of information that needs to be passed in
- Live matrix what we are working towards so we can go back and reevaluate, if necessary

New Agenda Items

Justin Goulet

Project Assignments:

- Decision Matrix -
 - All team members
- Project Development -
 - Chris Larsen and Brock Corbett (Development Team)
- Additional Themes -
 - Mikal Callahan, Justin Goulet (Design Team)
- User Manual
 - o All team members (Primarily Justin Goulet, PM)
 - Will be Word document, unless explicitly stated.
 - Will contain in-depth examples and guidelines.

SRS: The document can be found <u>here</u> or in a hyperlink in the <u>GitHub</u> Repository. The document will be altered as the project progresses.

Chris Larsen

JSON Object Structure: Proposed change to add "workflow" to object notation to separate out workflow metadata from state metadata (see attached).

Project Deliverables: We have provided our current set of deliverables as requested. The User Manual, is a work in progress, however, as we are merging integrations for ease of use.

Mikal Callahan

Design Outline:

What information would you like displayed in the user view vs admin view

- Is it just a matter of the ability to edit?
- Are CSS frameworks allowed if they are already included in the final project (not provided via CDN)

Namely looking at font-awesome,

 Possibly others such as bootstrap or milligram if want a fully responsive layout (mobile, tablet, desktop)

Thoughts on current design?

Brock Corbett

Input Management Methods: When you insert data, what would your preference of view be? (All children collapsed vs expanded)?

Color Theme: Would you prefer any other themes with the widget, or to change the layout of each node? Where will images be used, if any, due to restrictions in CSS (or will code be modified by JS, too?)?

In addition to this document, please review the attached documents:

- SRS Version 0.2 (Word Doc Attached) (Google Drive Editable Link)
- Sample Images and Code (Samples Folder)
- Wireframe Documentation
 - Will be sent separately, prior to meeting
